

## Arden University QUALITY ASSURANCE DOCUMENT QA3 - PROGRAMME SPECIFICATION

<b>1. Target Award</b>	BA
<b>2. Programme Title</b>	BA (Hons) Psychology & Sociology
<b>3. Exit Awards</b>	Certificate of Higher Education in Psychology & Sociology (120 credits) Diploma of Higher Education in Psychology & Sociology (240 credits) BA (Ordinary) in Psychology & Sociology (300 credits).
<b>4. Programme Leader(s)</b>	Angela Burns
<b>5. Delivery Model</b>	Blended Learning Online Learning
<b>6. Start date</b>	January 2017
<b>7. Programme Accredited by</b> <i>(PSRB or other, if applicable)</i>	N/A
<b>8. UCAS Code</b> <i>(If applicable)</i>	
<b>9. Relevant QAA subject benchmark statement</b>	Sociology (2007); Psychology (2010)

### 10. Programme Aims

The overall aim of the BA (Hons) Psychology & Sociology enables students to study two well-established fields in the social sciences. Both areas explore and study human behaviours at different levels. While psychologists focus on individuals (human behaviours), sociologists examine broader social processes, including poverty, inequality and social injustice, alongside global social processes, such as the effects of governmental policies, including neoliberalism and globalisation, upon divergent social groups. The two disciplines complement each other well, taking a micro and macro focus simultaneously and enable students to have a balanced understanding of the inter-relationship between both individuals and societal formations.

Students are to spend equal time on Psychology & Sociology. Therefore, students are to acquire knowledge, understanding and a range of practical skills relating to both disciplines. At the same time, students will develop a range of transferrable skills that will aid them as they pursue Law related, or public-sector employment, or other careers and further relevant study. More specifically it will:

- Provide a study of the foundations and theory of Sociology and Psychology and a firm grounding in related studies.
- Provide the students with a sound educational experience that will enable them to acquire a solid grounding in principles, theories and methods, which will embrace all the subject specific abilities, transferable intellectual skills and key skills set down in the current Sociology and Psychology Subject Benchmarks for England, Wales and Northern Ireland.
- Stimulate students into adopting an enquiring and critical appreciation of these disciplines as well as developing an appreciation of the different contexts in which they operate.
- Stimulate students into becoming critical and scientific minded social scientist, who can competently handle both sociological and psychological issues.
- Encourage students to accept responsibility for their own learning, as well as to support them to learn independently using initiative and self-discipline.
- Provide students with the support they require in order to enhance their eventual employability through taught skills, teaching methods and assessment, our values and Arden Graduate Attributes within the programmes.
- To provide opportunities for development of personal and other key skills appropriate for graduate employment in different areas including industry, commerce and the related professions, public service or further postgraduate studies.

11. Intended programme learning outcomes and the means by which they are achieved and demonstrated		
11a. Knowledge and understanding	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
<p>A1 Demonstrate factual and conceptual knowledge of the nature of social relationships and change.</p> <p>A2 Evaluate the issues and problems involved in the use of comparison in Sociology and Psychology whilst showing an awareness of contexts and frameworks.</p> <p>A3 Demonstrate a comprehensive and detailed knowledge of a range of key concepts and competing theories within Psychology and Sociology.</p> <p>A4 Demonstrate an awareness of commercial, political, social, environmental, ethical considerations evident in complex problems and show how these underpin theory.</p> <p>A5 Demonstrate knowledge and understanding of the influences of psychological functioning and social processes on individual and group development.</p> <p>A6 Demonstrate knowledge and understanding of the disciplines of Psychology and Sociology set within the broader context of the social sciences.</p>	<p>Acquisition of knowledge and understanding is facilitated through a combination of seminars, workshops and tutorials; group discussions and independent and directed study, supported throughout by comprehensive online teaching materials and broader resources. We achieve this through a pedagogy that includes project work, group forums and project-based activities.</p> <p>That is:</p> <p><b>Asynchronous</b></p> <ul style="list-style-type: none"> <li>• Independent and directed student study, supported throughout by comprehensive online multi-media teaching materials and resources accessed through our VLE</li> <li>• Guided group / project based work</li> <li>• Discussion forums where students discuss and critically engage with themes emerging from the materials they engage with, following the posing of questions or propositions, case studies or similar by either tutor or students themselves</li> <li>• Podcasts and narrated PowerPoints</li> </ul> <p><b>Synchronous</b></p> <ul style="list-style-type: none"> <li>• Face-to-face seminars where theory and practice are integrated.</li> <li>• Independent and directed student study, supported throughout by comprehensive teaching materials and resources.</li> <li>• Guided group / project based work</li> </ul> <p>Throughout, the learner is encouraged to undertake independent study to both supplement and consolidate what is being learnt and to broaden their individual knowledge and understanding of the subject. Learning is facilitated largely by set tasks with regular tutor support including small group forums. This allows students to not only discuss with staff their own work and progress, but to also see other students' work and to engage in the discussions that relate to the work of their peers.</p>	<p>Assessment methods and strategies:</p> <p>Our assessment strategy encourages a variety of assessment methods all explicitly aligned to learning outcomes that focus upon knowledge, understanding and skills. These are contextualised so that the assessment is directly relevant to each subject area and assessment methods include case study analysis, written essays, self-reflection, portfolios of evidence, sector report production, preparation of a subject-specific plan, etc.</p>

<p>A7 Demonstrate knowledge and understanding of a range of research paradigms, methodological approaches and basic measurement and analytical techniques. Provide students with a range of methodological and data analysis skills as a means of analysing and evaluating competing views.</p> <p>A8 Demonstrate knowledge and a critical understanding of a range of skills and knowledge, which would make students suitable candidates for employment in a wide range of occupations or for postgraduate study.</p> <p>A9 Knowledge and critical understanding of several specialised areas and applications, some of which are at the cutting edge of the discipline.</p> <p>A10 An awareness of the distinctive character of both Psychology and Sociology in relation to other forms of understanding, such as the relation to other disciplines and to everyday explanations.</p>	<p>There is a requirement for written work at all levels including reports, essays, practical tasks, developed plans, time constrained set work, etc. Our assessment policy informs how feedback is supplied by tutors at the formative and summative assessment phases. Developing critical analysis through a structured taxonomy is encouraged as students progress through levels 4 - 5 culminating in a dissertation at level 6.</p> <p>All students complete an induction module prior to starting on subject discipline units of work. The induction module requires students to undertake a range of tasks that both test and develop subject specific and online pedagogical knowledge, understanding and skills.</p>	
<p><b>11b. Intellectual Skills</b></p>	<p><b>The means by which these outcomes are achieved</b></p>	<p><b>The means by which these outcomes are demonstrated</b></p>
<p>B1 Demonstrate the ability to apply knowledge to a situation of limited complexity in order to provide well-reasoned conclusions to problems.</p>	<p>Intellectual skills are developed throughout the programme by the methods and strategies outlined in section A, above. Intellectual development is further encouraged via formative assessment tasks including set briefs, in-module activities, self-initiated briefs, and discussion with tutors and peers both face to face and online.</p>	<p>Assessment methods and strategies:</p> <p>Our assessment strategy encourages a variety of assessment methods all explicitly aligned to learning outcomes</p>

<p>B2 Conduct accurate and efficient searches of credible websites and databases and demonstrate insight in presenting materials and data drawn from a variety of appropriate primary and secondary sources including academic journals.</p> <p>B3 Analyse conceptual and doctrinal difficulties within the study of Sociology and Psychology and present solutions to contentious debates.</p> <p>B4 Recognise different and competing perspectives on psychological and sociological issues and that these disciplines involve a range of research methods, theories, evidence and applications.</p> <p>B5 Synthesise ideas and findings across different perspectives in Psychology and Sociology, recognising distinctive approaches to relevant issues.</p> <p>B6 Identify general patterns in theoretical approaches which have been developed in relation to psychological and sociological issues.</p>	<p>Specific modules support the development self-reflective skills and this is the focus of the opening Skills for Interdisciplinary Study module. In addition, the student’s thinking skills will be evident in a summative assessment process which requires and rewards learners for the demonstration of creative thinking and problem solving, analysis, judgement and self-reflection in the development of solutions.</p>	<p>that focus upon knowledge, understanding and skills. These are contextualised so that the assessment is directly relevant to each subject area and assessment methods include case study analysis, written essays, self-reflection, portfolios of evidence, sector report production, preparation of a targeted plan, etc.</p>
<p><b>11c. Practical Skills</b></p>	<p><b>The means by which these outcomes are achieved</b></p>	<p><b>The means by which these outcomes are demonstrated</b></p>
<p>C1 Engage in academic debate in a professional manner.</p>	<p>Practical skills are employed in the production of ethical solutions to real life situations developed through set briefs and are a particular focus in Research and Ethics in Action, Research Planning and Project and Skills for Interdisciplinary Study. The important modern day skills of engaging in</p>	<p>To support the development of practical skills, students must supply worked materials and evidence in completion of their assignments. Sound reasoning,</p>

<p>C2 Work productively and independently both within and between disciplines to produce work in a variety of formats as specified.</p> <p>C3 Present information clearly and coherently in an appropriate form using subject specific terminology.</p> <p>C4 Show an ability to read a range of complex academic works suitable for study at undergraduate level, summarising the arguments accurately and ranking in accordance of merit and substance.</p> <p>C5 Examine practical, theoretical and ethical issues associated with the use of different methodologies, paradigms and methods of analysis.</p> <p>C6 Construct discipline-specific and informed questions and, deploy appropriate research methodologies and data collection methods and evaluate research findings examining practical, ethical and theoretical constraints associated with the chosen methodology and paradigm.</p> <p>C7 Demonstrate a confident understanding of interdisciplinary themes and skills and comment on the value of this work with regard to policy issues.</p>	<p>academic debate, working independently and presenting ideas clearly using appropriate terminology pervade all modules and forms of assessment on the programme.</p> <p>Practical skills are further developed and integrated through a series of in-course and online activities and projects intended to test skills acquired. Group discussion forums provide opportunities for peer-to-peer discussion of ideas, progress, the work of others and the strengths and weakness in the work and ideas presented and particularly support the development of flexibility and adaptation. Activities are provided so that students can work independently to consolidate their knowledge and grasp of practical skills.</p>	<p>good presentation and evidence trails in all assignments are rewarded. Assessment briefs include a variety of commercial and geographical contextual settings. Students receive formative feedback on all tasks, activities and assessments, which include practical examples towards improvement.</p>
--	--	---

<p>C8 Demonstrate a confident understanding of interdisciplinary themes and problem-solving skills.</p>		
<p><b>11d. Transferable skills</b></p>	<p><b>The means by which these outcomes are achieved and demonstrated</b></p>	<p><b>The means by which these outcomes are demonstrated</b></p>
<p>D1 Communicate succinctly in written and oral forms at a level suitable for an undergraduate student.</p> <p>D2 Reflect upon working supportively and effectively in collaboration with others and evaluate own strengths and weaknesses in engaging in critical reflection and acting on feedback.</p> <p>D3 Take responsibility for own learning, acting independently in planning and managing tasks with limited guidance.</p>	<p>Transferable skills are developed throughout the programme. The skills of communication, critical use and acknowledgement of source material especially the internet, and research informing practice are integral to coursework at all levels.</p> <p>All modules promote practical application and employability that a student may develop further in their dissertation topic at level 6 if they wish.</p> <p>As work becomes more progressively more complex at levels 5 and 6, students are required to draw upon their skill sets to manage increasingly large workloads. Students are required to complete a number of assignments and a dissertation in level 6 that demonstrate independence and originality, and critical enquiry, and which further enhance communication and self-reflective skills.</p>	<p>To embed transferable skills all assignments must meet time deadlines and word count guidelines as guided by our policies All assessed work must be submitted independently even where group activity has been an element of the process. Students must take responsibility for their own work. All assignments require students to engage in critical enquiry and self-reflection, which is rewarded in marking guides. These guides, in line with good practice are available to students and are included with every assignment brief.</p>

## Psychology & Sociology Exit Awards: Programme Outcomes

As a joint honours award, students will be required to meet the credit thresholds set out in the AU Assessment Regulations. It is therefore not possible to map precisely which outcomes will be met for each exit award as this will depend across which modules the credits have been achieved. However, the table below provides an indication which Programme Outcomes will typically be achieved for each exit award.

Exit Award	Knowledge & Understanding	Intellectual Skills	Practical Skills	Transferrable Skills
<b>BA (Ordinary) (300 credits)</b>	A1, A2, A3, A4, A5, A6, A8, A9 A10	B1, B2, B3, B4	C1, C2, C3, C4, C6	D1, D2, D3
<b>Diploma of Higher Education (240 credits)</b>	A1, A2, A4	B1, B2, B4	C1, C2, C3, C5	D1, D3
<b>Certificate of Higher Education (120 credits)</b>	A1	B1	C1, C2, C3	D1, D3

### 12. Graduate Attributes and the means by which they are achieved and demonstrated

#### Graduate Attributes

The concept of the Arden Graduate, based upon the definition of 'graduate attribute' by Bowden et al (2000) has been developed around 6 attributes:

- E1 – Discipline Expertise
- E2 – Effective Communication
- E3 – Responsible Global Citizenship
- E4 - Professional Skills
- E5 - Reflective Practitioner
- 06 - Lifelong Learning

#### The means by which these outcomes are achieved and demonstrated

All six attributes are relevant to this programme but will be developed through levels 4-6 of the undergraduate award where they are integrated into all programmes of study curriculum, unit study tasks (individual and group work) and through summative assessment tasks.

### 13. Learning and teaching methods and strategies

Learning and teaching methods and strategies are delivered through an integrated learning and teaching pedagogy that includes both asynchronous and synchronous activity. That is:

#### Asynchronous

- Independent and directed student study, supported throughout by comprehensive online multi-media teaching materials and resources accessed through our Virtual Learning Environment
- Guided group / project based work
- Research tasks
- Discussion forums where students discuss and critically engage with themes emerging from the online materials they engage with, following the posing of questions or propositions, case studies or similar

by either tutor or students themselves

- Podcasts and narrated PowerPoints

#### Synchronous

- Face to face or Adobe Connect seminars where theory and practice are integrated.
- Independent and directed student study, supported throughout by comprehensive teaching materials and resources.
- Guided group / project based work.

Based upon our typical student profile, our strategy enables students to engage with a variety of learning tools that best meet their learning styles, overall objectives and personal circumstances.

Independent study is the cornerstone of the learner experience, supported by peer engagement and engagement with the tutor.

There is a requirement for written work at all levels including reports, essays, practical tasks, developed plans, timed examinations, portfolios of work etc., and our assessment policy informs how feedback is supplied by tutors at the formative and summative assessment stage.

#### **14. Assessment methods and strategies**

Our assessment strategy encourages a variety of assessment methods all explicitly aligned to learning outcomes that focus upon knowledge, understanding and skills. These are contextualised so that the assessment is directly relevant to each subject area and assessment methods include case study analysis, written essay, critical self-reflection, portfolios of evidence, sector report production, preparation of a targeted sector plan, time constrained tests, etc. All students will have the opportunity to engage in an activity and receive formative feedback from the tutor before the summative assessment.

#### **15. Employability**

Our approach pays due regard to the UKCES report 'The Employability Challenge' (2009a) definition of employability, 'the skills almost everyone needs to do almost any job. They are the skills that must be present to enable an individual to use the more specific knowledge and technical skills that their particular workplaces will require.'

#### **16. Entry Requirements**

Two Subjects at GCE A level or equivalent, plus passes at grade C or above in three subjects at GCSE level or equivalent; or

Completion of a recognised Access Programme or equivalent.

IELTS 6.0 (no less than 5.5 in any element) or equivalent for students whose medium of prior learning was not English.

Candidates who demonstrate an ability to study the programme as evidenced through previous a personal statement (of between 350-500 words) that addresses their motivation for undertaking the programme; including their references, relevant prior experience and qualifications.

Exemptions may be granted in respect of other qualifications subject to Arden University's APL regulations.
